FUND DESCRIPTION

This fund invests in bank deposits and short-term investments on international money markets. The objective of the fund is to provide a low risk investment income. Deposits are made with a range of highly rated international counterparties and domestic institutions, to secure reasonable levels of interest. In general, the higher the credit rating of an institution, the lower the interest rate they will pay for deposits. Conversely, a lower credit rated institution will usually have to pay higher interest rates. The credit ratings are provided by independent third party rating agencies like Moody's, Standard and Poor's or Fitch. They rate banks and other credit institutions on, amongst other factors, their financial strength and ability to repay their debts.

Warning: If you invest in this product you may lose some or all of the money you invest.
