

Public Sector Adventurous Fund

Information is correct at 31 March 2024

FUND FACTS

	Objective	To produce significant long-term real returns but with lower volatility than a standard managed fund
	Sustainability	Promotes environmental and social characteristics alongside other factors (Article 8 under the Sustainable Finance Disclosure Regulation)
	Investment Style	Passive
	Size	148.8 million

FUND DESCRIPTION

This is a passively managed fund that invests substantially in bonds, cash & equities with the balance in commodities and property. It aims to produce a better long-term real return than cash funds but with potentially lower volatility than a standard Managed Fund. We achieve this by investing in the same equity and bond stocks as those of the global indices in the same weightings. This removes the risk of poor stock choice. Property, commodities and cash aim to reduce overall fund volatility. This fund is a medium risk fund with lower levels of ups and downs than that of a managed fund.

Warning: If you invest in this product you may lose some or all of the money you invest.

IRISH LIFE RISK LEVEL (IL)

IL1	IL2	IL3	IL4	IL5	IL6	IL7
LOWER RISK					HIGHER RISK

Communication Services	6.9%
Consumer Staples	5.6%
Energy	4.5%
Materials	3.8%
Other	6.1%

BOND PORTFOLIO CREDIT QUALITY

The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return.

This fund is provided by Irish Life Assurance plc and is managed by Irish Life Investment Managers Limited.

Warning: This fund may be affected by changes in currency exchange rates.

CALENDAR YEAR RETURN

	2018	2019	2020	2021	2022	2023	YTD
Fund	-4.63%	15.70%	0.49%	16.49%	-12.52%	12.13%	6.83%
Benchmark	4.28%	4.25%	4.19%	4.16%	4.54%	7.81%	2.06%

Benchmark: The standard against which the performance of the fund is measured. It typically includes market indices or weighted combinations of these as appropriate.

Warning: Past performance is not a reliable guide to future performance.

Warning: The value of your investment may go down as well as up.

RESPONSIBLE INVESTING KEY CHARACTERISTICS

RESPONSIBLE INVESTMENT APPROACH

In line with the overall fund objective, the fund targets investment in strategies which help contribute to achieving its sustainability goals.

This involves selecting strategies which exclude or reduce exposure to companies with poorer sustainability characteristics and increasing exposure to companies with better sustainability characteristics. Sustainability characteristics are also considered in the selection of property and alternative funds.

ESG RISK RATING

The Environmental, Social & Governance (ESG) Risk Rating measures the degree to which a company's economic value is at risk due to not considering ESG factors using a calculation of the company's unmanaged ESG risks.

*A lower score indicates a lower level of unmanaged ESG risk and potential risk to the economic value.

Sustainalytics' ESG Risk Ratings measure a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. This multi-dimensional way of measuring ESG risk combines the concepts of management and exposure to arrive at an absolute assessment of ESG risk. Sustainalytics identifies five categories of ESG risk severity that could impact a company's enterprise value.

Negligible	Low	Medium	High	Severe
0 - 10	10 - 20	20 - 30	30 - 40	40+

CARBON INTENSITY

Carbon intensity is a metric used to compare company emissions across industries. The absolute emissions is divided by total earnings with the figure expressed in tonnes of carbon dioxide equivalent per million USD of total revenue.

FOSSIL FUEL

Fossil Fuel Involvement measures the percentage of earnings that companies get from thermal coal extraction, coal-based power generation, oil and gas production, oil and gas based power generation, and oil and gas related products and services.

Note on Calculation of Sustainability Characteristics:

ESG metrics data sourced from Sustainalytics (Powered by Sustainalytics).

ESG risk scores and carbon metrics are currently calculated for Shares and Corporate Bonds only which represent 79.9% of the total portfolio. This reflects the majority (but potentially not all) of the Global Shares and Corporate Bonds in the portfolio.
